2011 BUYER'S GUIDE

Home Theater Systems have evolved over the years: you won't believe your eyes or your ears! Many home theater systems come in various configurations and options. For full specifications and pricing go to the manufacturer Web site.

Atlantic Technology AT-1
\$1,995 a pair
www.atlantictechnology.com
 AT-1 utilizes exclusive HPAS (Hybrid Pressure Acceleration System) technology to produce bass that breaks the Iron Law of loudspeakers: Finally, you get deep bass, high efficiency, and a compact enclosure all together! \$1,995 a pair. Combine with other Atlantic Technology speakers for a full home theater.

Digital Cinema Sound MTC-8K
www.dcssound.com

The MTC is a motorized in-ceiling loudspeaker. The MTC is comprised of an 8-inch Kevlar Woofer working in conjunction with a Titanium dome tweeter.

This speaker is designed to pivot out of the ceiling cavity and into the listening area with a nearly silent geared motor system.

Monitor Audio SoundFrame 1iW
www.monitoraudiousa.com

The SoundFrame is a slim profile, on-wall or flush-mounted in-wall "picture frame" style speaker. Its pivoting IDC driver module allows precise direction toward the listening area. Available with high gloss finishes and customizable grilles. Contact local dealer for pricing.

KEF T Series
www.kef.com
 Combines the aesthetic appeal and convenience of an ultra-thin, low-profile loudspeaker with the high-definition detail and dynamic performance of a superior loudspeaker. Only 35mm thick, the low drive-build height blends perfectly with ultra-thin TVs. Series prices vary.

Wharfedale Achromatic Ultimo System

\$699 - \$1,699
www.wharfedale.co.uk

The Series is entirely built in house from raw materials: from molten aluminum to drivers, to components within the crossover.

This results in unparalleled performance to cost ratio for ultimate performance. On wall vertical/horizontal mounting. \$699 to \$1,699 for system packages.

Klipsch Synergy Series
www.klipsch.com

With sonic precision and clarity, the newly re-engineered Synergy series includes eight refreshed models. Each speaker offers new high-frequency components, a new network structure, updated voicing and a more contemporary look. System pricing

MSE WL-Surround Wireless Surround Speaker
www.mseaudio.com

Requires only an AC power connection for operation. It features an on-wall Bipole/Dipole switchable design, active digital crossovers and 100w of total amplifier power split between the woofer and tweeters.

Leon Aaros A10-UT Ultra-Thin Subwoofer

www.leonspeakers.com
 Measuring only 4.5-inch deep, Leon's revolutionary Aaros 10-inch ultra-thin to stow or show subwoofer delivers extreme versatility and refined low end to any space. Team with other Leon speakers for a full home theater. System pricing varies.

Procella P815
\$1,500 - \$9,000
www.procella-audio.com

Audiophile accuracy and cinema impact make Procella's P815 the ultimate home cinema/screening room main speaker. The bi-amplified (700+700 watts) full-range 15-inch three-way speaker uses pro components. Full home theater speaker pricing; \$1,500 to \$9,000 each.
